

THE **DETECTION** GROUP
Wireless Water Leak Detection

A **WATTS** Brand

The Only Flood Stopping Device Designed for Commercial Use

STOPflow™ System

With Automatic Shut-Off Valve and Controller

Reliable – The valve automatically cycles every 30 days, ensuring it will close dependably when it's needed

Flexible Installation – Runs on plug power or battery, so you choose. Install it anywhere. Battery life is at least two years.

Code-Compliant – Certified to be potable water compliant

Corrosion Resistant – Made of high-grade 304 stainless steel that will not degrade over time

Commercial-Grade – Available for pipe sizes up to 2-inch diameter. Can control two valves of different sizes. Suitable for rugged commercial applications.

Wireless Water Leak Detection

A **WATTS** Brand

440 N Wolfe Rd E-126
Sunnyvale, CA 94085 USA
www.thedetectiongroup.com
415-941-5325 (LEAK)

It's Simple

1 Valve Controller detects a leak.

2 Actuator closes the valve.

Where to Use STOPflow™

- Buildings without 24 x 7 security personnel to investigate a leak
- Areas with restricted access or limited off-hours access
- NNN properties
- Places where even a small amount of water is unacceptable - server rooms, near switchgear equipment, and where valuables are stored
- Isolated, hard-to-get-to areas, such as a ceiling water heater
- Unoccupied space, where some of the most damaging leaks occur

Compare Before You Buy

Demand the only leak-detection system designed for commercial applications, when any water leakage is too much.
